

### Sport Mod/B-Mod Wheel and Tire Rule Update...5/3/22

In an effort to keep up with the increasing cost and low availability for tires in this class, the following rules are effective immediately and supercede the posted rules for this class:

Sport Modified/B-Mod's...TIRES...2 adjustments on tire rule:

1. Northern Sport Mods, Southern Sport Mods, and USRA Limited Mods WILL BE ALLOWED to groove their tires now in an effort to extend tire life. NOTE-USRA B-Mods were already allowed to groove their tires
2. Asphalt take offs have been allowed in competition in the Sport Modified/B-Mod since 2020 at Red Dirt Raceway but effective immediately: the minimum durometer for asphalt take offs is lowered to 45 and can be measured at ANY TIME...You CAN "dope" the asphalt take off tires but they must still meet the 45 durometer rule...ONLY 8" wheels will be allowed for use with asphalt take off tires...You can mix/match your "class" tire with asphalt take offs but no mixing of class tires(Southerns still must run H500 or asphalt take offs, Northerns must still run G-60 or asphalt take offs, etc...)
